STEAM-POWERED Saturdays

in the **THINQubator**

10 am- 1pm

Every First Saturday of the Month
at
Tech Valley Center of Gravity
30 Third Street in Troy

Children ages 4-12 and their families are invited to join us for a fun, free creative hands-on project.

Brought to you through the generous support of the Seymour Fox Foundation and the Albany Society of Engineers Foundation, these **FREE** mind-expanding projects help children discover creative play through science, technology, engineering, the arts and mathematics.

There is a different project every month! Visit www.facebook.com/THINQubatorTroy to learn what next month's project will be!

The THINQubator at Tech Valley Center of Gravity (TVCOG) offers programs and workshops designed to empower and encourage children to think, tinker, collaborate, skill-build, design and MAKE. We offer grant funded programming open to the public, field trips and workshops for schools, STEAM birthday parties and more! We are located on the first floor of TVCOG, the Capital Region's premiere makerspace.
